

# Network Security, Simplified

Remote Firewall Management for Your Business

## Security as a Service ■ Powered by SonicWall™

Stop viruses, spyware, worms, Trojans, key loggers, and more before they enter your network with all-in-one, comprehensive network protection. V-Soft provides you with the same level of network security that NASA demands and protects your networks from a wide range of emerging threats.

## V-Soft's Value Proposition

Businesses know they need a firewall; it is universally acknowledged as a foundational technology component of a network security strategy. However, most do not have the in-house technical and security expertise to properly configure, run, and manage a firewall. This combination has created a need in the market for managed firewall services.

Outsourcing your network security to a trained and experienced security expert can add peace of mind while being a cost-effective solution. Above and beyond standard services, while utilizing V-Soft's Security as a Service, you will be able to upgrade/exchange your firewall as your needs change and technology changes.

“

*“V-Soft's help desk and engineering teams are always responsive, thorough in their follow up, and deliver a very positive end user experience. V-Soft is a critical part of our continued success.”*

## Protect Your Business

Your employees need access to email, files, and applications wherever they are. With V-Soft's Security-as-a-Service offerings, you can allow mobile users to access your network with secure VPN remote access for Windows, Apple iOS, Android, Mac OS X and Kindle Fire devices and be assured that it is safe, secure, and free from threats. Detailed data is available through a single reporting system so it is easier to identify threats *before* your network has been compromised.

## An All-in-One Solution

Combine the features of traditional firewalls, gateway anti-malware products, intrusion prevention system and content filtering software in a single solution. All of these security technologies are installed, configured, deployed, and managed as one unit.

- Outsource your network security to an *experienced* security provider
- Firewall expertly configured by SonicWall-certified engineers
- Turn-key solution delivered to your doorstep
- Proactive monitoring and alerting
- Updating of firmware, software, and security updates
- Automated weekly network and security reports
- Report analysis by SonicWall-certified engineers
