

Engineering Services

Certified. Experienced. Proven.

Assessing & Designing Your Infrastructure

- Gain a current state assessment
- Align corporate standards with industry-proven practices
- Build a best value Basis of Design (BOD)

Planning for Success

- Develop construction specifications
- Plan remediations
- Utilize spectrum of skills and services

Implementing & Documenting

- Execute BOD
- Maintain industry quality control standards
- Complete with cradle-to-grave reporting

Value Adds

AutoCAD Services

- Industry standard drawings
- Plotting services
- Graphical representations

EOL/EOS Rack & Stack

- Plan
- Assess
- Remove
- Install

Case Studies

The Company

Fortune 500 Company

Challenge:

Lack of standards and implementation caused inconsistencies, resulting in cost and failures.

Solution:

Suggested single source implementation team and documented standards across the enterprise.

Result:

Accurate and rapid response times, decreased cost, and improved reliability.

The Company

National Retail Chain

Challenge:

Not keeping up with current technology prevented new and existing stores from meeting industry standards.

Solution:

Provided RCDD experts to bridge knowledge gaps.

Result:

Every new and redesigned store is being built with current technology and follows EIA/TIA communications standards.
