

VSI Structured Cabling

Your vision realized with expert precision

Your Ideal IT Environment

Our team of experts works with your decision-makers to learn what you want most out of your infrastructure. We plan the perfect environment and make sure to execute the project to match your budget and timeline.

Expert Implementation

V-Soft Infrastructure utilizes internal RCDD-certified engineers to oversee and assure quality in every project. You benefit from expert project management with experience installing enterprise-class systems and supporting IMACs (Install, Moves, Adds, Changes).

- National Footprint
- 24/7 Support
- Project Management
- Complete Sourcing

Case Studies

Company

Fortune 100 Consumer Goods Conglomerate

Challenge

Lack of infrastructure standards caused inconsistencies, resulting in higher costs and increased downtime

Solution

Implementation and project management teams document and enforce standards company wide

Result

Accelerates response times by 72%, decreases costs and improves reliability

Company

National Retail Chain

Challenge

Outdated tech prevented new and existing stores from meeting industry standards and consumer demands

Solution

RCDD experts bridge knowledge gaps and design advanced infrastructure that exceeds benchmarks

Result

100% of new and redesigned stores are outfitted with advanced tech and follow EIA/TIA standards
