V-Soft Digital's AI Consulting Services
## Accelerate Innovation

Customized AI Journey

Trusted by leading companies to advance intelligent initiatives, the V-Soft Artificial Intelligence (AI) team provides experience and guidance. Each AI journey may start at a different place, with some organizations ready to deploy immediately and others requesting feasibility studies, value-case analysis, or other workshops. V-Soft's service capabilities and engagement approach allows you to start at the right place in the process and empowers the most relevant AI journey for your digital transformation.

V-Soft Thought Leadership

V-Soft's AI team consists of industry-recognized thought leaders in Design Thinking, Mind Mapping, Value-Case Analysis and more, to support the native complexity and vast interdependency of this emerging technology. This proven approach has provided leading companies with the tools necessary to execute a comprehensive AI strategy.

AI Consultation

CRAWL — **Enablement Workshops** (Design Thinking, Mind Mapping)

WALK — **Feasibility Studies** (Business Value Assessment, Value-Stream Mapping)

RUN — **Industry Programs** (On-Site Proof of Concepts, In-Lab Incubators)

FLY — **Functional Prototypes & Deployment**

Case Studies

Company
Multinational Manufacturer

Challenge
Poor customer engagement, unsure of technical feasibility with AI

Solution
V-Soft implemented an operational and IT landscape assessment, AI digital strategy plan, value case and pilot project

Result
AI Consulting Services provided a clear understanding of pre-requisites and next steps needed to scale the system

Company
Energy Tubulars Distributor

Challenge
Inability to align operation and information tech teams to deploy AI

Solution
V-Soft's design thinking workshop supported user-centric design of AI, technical and value case assessment of different implementation areas

Result
AI plan led to the collective buy-in from OT and IT on a comprehensive AI strategy and roll-out roadmap
