Health & Safety Solution
Convenient. Affordable. Efficient.

BACK TO WORK

Solution for Back to Work

In the best interest of employee health, V-Soft Digital' back to work app helps workplaces ensure the safety of their communities. This no-touch solution encourages social distancing and proper PPE protocols, and can be utilized in one office or can be rolled out to the entire organization.

Reporting Analytics

Advanced reporting features have the capability to tie into your backend systems, aligning data to individuals and sending notifications to relevant stakeholders based on set rules. Robust reporting features allow you to keep the historical data and deliver to governing authorities and/or for future review.

Enhancements

- Thermal Cameras
- Bluetooth Thermometers
- Computer Vision Systems
- Barcode Scanning

BACK TO WORK SOLUTION FEATURES

Self-Certification Surveys

Give employees and guests an easily accessible app to self-certify prior to entering the building that they are not exhibiting any symptoms or have not been in contact with anyone who may be symptomatic. The survey can be easily modified in the backend to fit your organization's specific needs.

Contactless Health Screening

The app can be integrated with your temperature checking devices via a barcode scanner, eliminating manual data entry. The app automatically syncs with thermal cameras and Bluetooth thermometers alerting stakeholders if high temperatures are detected.

Contact Tracing

Infected employees or guests can be identified through the app, where the individual has been can be traced using GPS Tracking or Bluetooth, and alerts can be sent to whoever was around the infected person, all while maintaining privacy and security.

Social Distancing Monitoring

Connect your app with our state-of-the-art Computer Vision System that can alert stakeholders if people are too close to one another or are not wearing proper personal protective equipment (PPE).
