

CASE STUDY

HEALTHCARE SERVICES

Company

The client is a leader in the healthcare industry.

Challenge

The client was struggling to help patients be up-to-dated with their daily routines before and after procedures (surgical operations).

Solution

V-Soft devised a comprehensive AWS Cloud-based data collection mobile platform solution. The solution is based on the end-user business needs for managing patient daily routines and making them interact with the app and keep track of their task.

Result

V-Soft provided an automated hassle-free single platform for Healthcare Services. The solution minimized all manual operations and provided an easy interface to interact with their medication activities.

Benefits

- Helps patients with their daily routine.
- Updates with their procedure date and time.
- Notifies them on time to follow their tasks/activities.
- Provides hospital map.
- Provides diet plans before and after surgery.
- Provides discharge instructions.

Integrated
System

100%

TECHNOLOGY APPLIED

- AWS Mobile Services
– AppSync, S3, Push Notification, DynamoDB.
- XCode, Swift, iOS, Android Studio, Java, Android, PHP, AWS, APNs
