V-SOFT®
LABS - INVENTING TECH

Mobile App Development ▪ Designed for Business

With a history of successful app design and development rollouts, V-Soft utilizes the latest in technologies and methodologies available. **V-Soft's app development process collects and translates business requirements into innovative technology solutions.**

V-Soft brings both of these proficiencies together, providing optimum resources and capabilities for your MuleSoft™ project with direct engagement and transparency you will not find elsewhere.

Proven Expertise ▪ From Concept to Completion

Transparency and collaboration are a part of our DNA. V-Soft involves you in every step of the project from concept to launch to support. **We build your app with you, not just for you.** You'll know what we know in real time with this collaborative approach.
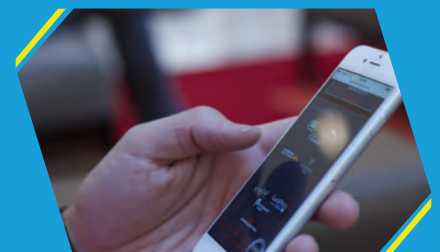

- iOS & Android, HTML5, jQuery, Hybrid, PhoneGap, Cordova
- AngularJS, Bootstrap, Ionic Framework
- Push Notifications, GPS, Augmented Reality, Maps
- Integration expertise with ServiceNow, SalesForce, Oracle, MuleSoft and more

Why V-Soft?

V-Soft has global sources of expertise with locations in the U.S. and India. You enjoy the benefit of on-site project management, trusted work flow processes and cost effective resources. The result is that **you get mobile app development on time, under budget, and beyond expectations.**

"We are a quality company and expect the same from vendors. V-Soft matches that need. If they say they are going to do something they do it."

- VP Enterprise Systems and Software Development

Expertise ▪ Pillars of Product Development

Every app we develop is a signature of you and your trusted V-Soft team. The fundamental pillars illustrated below are how **every app is built to ensure complete customer satisfaction** before, during, and after delivery.

- **Scalability & Reliability** for today, tomorrow, and the future
- **Performance** for optimal CPU utilization, specified response time, and throughput rates
- **Security** with the most advanced global security standards/regulations, authentication and encryption
- **Portability** designed in to be adaptable and installable across devices irrespective of hardware or software

*"V-Soft is different than other companies I've dealt with because they have the ability to **manage my project locally, but utilize global resources** to get the most ROI for my budget."*

\- Alan G., CEO, National B2B Service Company

V-Soft's Mobile App Development

- **Hybrid sourcing model** for all budgets
- **Local project management**
- **Full transparency** and real-time communication
- **Leading technology**

An innovative approach that is on time, on budget, and beyond expectations.
